

Grout & render waterproofing admixture

For waterproofing ceramic tile grouts & all cement based renders

Used as a direct replacement for water in ceramic tile grouts & cement based renders. Once cured all of the grout or render will be permanently waterproof. The product stops the moisture from penetrating from both the positive & negative sides and eliminates efflorescence forming on the surface.

The product is ready to use, diluted the waterproofing properties will be reduced.

There are no preferred methods of adding the solution to the dry ingredients, add it the same as you would normally add the water component.

The product is milky white in appearance has a specific gravity of 0.99

Ph value of 7–8

Flash point of >100°C

Solvent free aqueous solution

As raw materials and conditions vary, it is recommended that a trial should be conducted to determine the suitability of this product for the intended purpose.

Product is available in;
1, 5 and 20 litre containers

Shake/Stir well prior to use

Use in well ventilated areas.

First Aid

Eyes Flush eyes with water for at least 15 minutes
